Pamplin Farmers Class to Start

Adult Farmers Evening Classes will be held in the Pamplin School building every week for ten weeks beginning Thursday night, February 2, at 7:30 o'clock. The Pamplin Ruritan Club and the Appomattox Vocational Agriculture Department are co-sponsoring these classes in an effort to help local farmers keep up with the latest developments in the field of farming and farm management.

The first meeting will feature an Internal Revenue Agent, who will lead a discussion on "Filing Farm Income Taxes." It is expected that the new social security features which apply to farmers will come in for much of the discussion. Topics for the ten meetings have been chosen by an agricultural advisory committee from the Ruritan Club working with W. Lewis Motley, vocational agriculture instructor. Members of the committee are: Cecil Ligon, Earl Smith, E. M. Sears, Luther Nash, and James Rosser.

Classes will meet every Thursday night at 7:30, with the following topics planned:

Feb. 2.- Filing Farm Income Taxes—H. Franklin Bryant, Internal Revenue Agent as leader.

Feb. 9.- Appomattox A. C. P. Program—J. N. Jennings, ACP Office manager.

Feb. 16.- Renewing the Forest—R. F. Holmes, Forester.

Feb. 23.- Winter Feeding of Cattle—Leonard Starling, Voc-Ag Instructor.

March 1.- Planning Home Garden—O. L. Waddell, Voc-Ag Instructor.

March 8.- Small Fruits on the Farm—H. B. Arorian, Horticulturist, V. P. I.

March 15.- Establishing Alfalfa—W. L. Motley, Voc-Ag. Inst.

March 22.- Preventing Animal Diseases—to be announced.

March 29.- Operation, Care of Electric Motors—to be announced.

April 5.- Canning and Food Preservation—W. C. Dudley, Area Supervisor, Voc-Agriculture.

Hixburg

Hixburg, Jan. 24.- The Lucky Clover 4-H Club met in the home of Mr. Henry Covington on Friday evening, January 20. Present were fifteen members and Mesdames B. G. Anderson, Rob Martin, Bob Covington, Lawrence Nash and Mr. Bailey Wilkins, Assistant County Agent. Mrs. Rob Martin is the club leader.

On Thursday evening, at 8:00 o'clock, on January 26, there will be a demonstration party in the home of Mrs. Jim Carson.

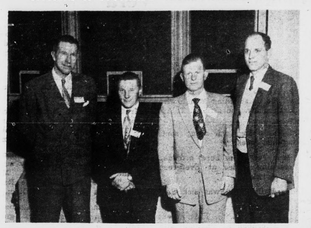
Mrs. William Hix and daughter, Jane have returned to their home after spending ten days with Mrs. R. H. Oliver, in Prospect.

Recent visitors in the home of Miss Maggie Hix were Mesdames Ernest Harwood, Andrew Coleman, Edwin Fore and Mr. and Mrs. Ed McPhillips.

Mr. P. L. Rogers, of Front Royal was the week-end guest of Mr. and Mrs. Edwin Fore.

Mr. DeWitt Goin has been confined to his bed ever since Christmas.

OFFICERS OF SOUTHSIDE YOUNG FARMERS ASS'N.



Officers of Southside Virginia Young Farmers Association,, T. J. Cardwell, Concord, president; John M. Hankins, Spring Garden, treasurer; Sam Davidson, Appomattox, secretary, and Harold Bailey, Buckingham, vice-president.

SENATOR BYRD ALARMED AT EISENHOWER BUDGET

Senator Harry F. Byrd has released the following comment on the proposed federal budget for the next fiscal year.

"The most significant and, to me, the most disconcerting part of the President's budget message is that he proposes a startling increase in appropriations. The fiscal year 1957 budget just submitted recommends appropriations of $66.3 billion, as compared to $62 billion for fiscal year 1956 and $57.1 billion for fiscal year 1955. That is to say that in 1957 appropriations will exceed those enacted in 1955 by more than $9 billion.

"It is alarming to note that this message recommends appropriations for programs under new statutory legislation to the extent of $8.5 billion, of which $6 billion would be for expenditure in future years.

"Appropriations have been increased in practically every major category and many of the increases are in broad areas covered by new spending programs. There are appropriation increases for the military and foreign aid—both military and economic; and in domestic civilian programs, including grants-in-aid to states and local governments, payments to individuals and public works.

"It is true that all of the recommended appropriations for fiscal year 1957 will not be spent in that fiscal year, but appropriations once made are never cancelled, and we are increasing the potential spending in future years.

"The estimated surplus of $400 million in the budget for the coming year with total expenditures of $66 billion is so fragile as to be utterly undependable. The errors in estimating revenue in advance are clearly illustrated by the fact that the administration, as recently as August, estimated a deficit for the current fiscal year of $1.7 billion and now it estimates a surplus of $200 million for this year.

"What disturbs and disappoints me is the fact that we are now embarking on new and greatly increased expenditures on the premise, apparently, that the present boom will continue, and this no one can predict.

"What we need is less spending. We are at peace. We are enjoying the greatest prosperity, for the moment, in our history. Unless we take advantage of this and start reducing the public debt, and paying the way toward future tax reductions, it is hardly likely that we will see sound fiscal policies for many years to come.

"We must not forget our dependence upon income taxes. Should the national income drop as little as $10 billion, it would result in a reduction in revenue of $2.5 billion, which would unbalance the budget, throw us into deficit financing again and increase the terrible federal debt.

"It is more imperative than ever that the Congress stop this orgy of new spending and restore this country to principles of sound finance."

Stonewall

Stonewall, Jan. 24.- We had some snow and ice last Thursday. Was pretty like Christmas usually is. It helped the ground to be moist and the tobacco to be a little softer.

Mr. and Mrs. C. D. Carson visited his mother, Mrs. Lula Morgan, in Roanoke last Sunday. She is not feeling so very well at this time.

Mr. Virgil Carson and family, of Roanoke visited Mr. and Mrs. Lester Carson on Sunday.

Mr. and Mrs. Vinson Russell and two children, Mark and Bonnie Faye, of Richmond, and Mr. and Mrs. Calvin Tanner, of Lynchburg spent the week-end with Mr. and Mrs. Lyle Thomas.

Rev. Aaron Smith preached a grand sermon at Bethel Church on Sunday morning. Rev. Smith and Mrs. Calvin Tanner brought a wonderful message in the song they sang together. It was enjoyed by all present and was very helpful.

Mr. and Mrs. Henry Beard and son, Lawrence were dinner guests of her parents, Mr. and Mrs. E. L. Chick on Sunday.

Mrs. Jim McHenry and daughter and Mrs. Willie Coleman called in the Chick home on last Wednesday. Their visit was much enjoyed. Hope they will all call again soon.

Glad to know little Clyde Bondurant is getting on nicely after having the mumps last week.

Congratulations to Mr. Richard Bondurant, who sold tobacco in Farmville last week and got such good prices.

Mr. and Mrs. Tom Christian, of Covington visited relatives here last week-end.

Mr. Lyle Caldwell spent Sunday with Mrs. R. H. Thornhill and her household.

GENERAL ASSEMBLY TO MEET IN WILLIAMSBURG

Williamsburg, Va.- Sir Roger Makins, British Ambassador to the United States, will address the commemorative session of the Virginia General Assembly here on January 28, it was announced by Colonial Williamsburg. Governor Thomas B. Stanley will also address the session, to be held in the reconstructed colonial Capitol building.

America's oldest representative legislative body, the General Assembly has held a joint session in Williamsburg once every two years since 1934, with the exception of 1944 and 1946.

The ceremonies on January 28 will begin at 11:00 A. M., and Ambassador Makins is scheduled to speak at 12 noon. After a luncheon in the Williamsburg Lodge, members of the Assembly and special guests will tour the restored area.

This year marks the 22nd year since the commemorative sessions were started in 1934. It is also the 177th anniversary year of the Assembly's first sessions in Williamsburg before Virginia's governmental functions were moved to Richmond in 1779.

The International Press Institute reported that Government pressures on the press tended to increase, even in free countries.

THE L. L. MASON FARM

AND PERSONAL PROPERTY

AT AUCTION

SATURDAY, FEBRUARY 4th

AT 10:00 A. M.

Located on the North side of Route 615 at Red House, Charlotte County, Virginia

259 acres, more or less; about 100 acres open land, most of which is in high state of cultivation, about 15 acres partially cleared; balance wooded. 4.2 acre tobacco allotment (1955) 18 acre wheat allotment. 3 acres seeded in rye, 4 acres in cover crops, 2 acres in clover, 30 acres in lespedeza.

Seven room frame dwelling, with bath. 5 room tenant dwelling, 3 tobacco barns, pack house with pit, machine shed, storage house and other necessary outbuildings.

This is an excellent, all purpose farm, all of which can be farmed with machinery. Well watered. Ideally located. Long road frontage on Route 615 and 644.

PARTIAL LIST OF PERSONAL PROPERTY TO BE SOLD:

Allis Chalmers "WD" Tractor
Tractor Plow
Tractor Disc
Wood Saw
Cultivator
David Bradley farm wagon (on rubber)
Horse Drawn Equipment
2-Row Tobacco Sprayer
John Deere Grain Drill (new)
Henry Vann Tobacco Curer
2 Mules
25 Barrells Corn
Lot Lespedeza Seed
Lot Oats
Electric Stove
Refrigerator
Dining Room Suite

Many other items too numerous to mention, consisting of farming tools and household goods.

...erstood Scripture: Luke 15:1-32. ...evotional Reading: John 3:1-11.

Lure of Life

Lesson for January 29, 1956

...coin, a sheep, a man—what ...do these three have in com... Jesus told a triple story ...ur these three so different ob... to bring out the same point. ...st the coin, the sheep, the ...n had in common was that ...was lost. They were out ...place, useless, in fact doing ...ve harm than ...od. But the ...man who ...nt to a far ...ntry was differ... in an impor... way. He ...what he was ...or thought ...ow. He wanted ...e, and he got ...only it was the ...ong sort If you had asked him ...hat why he was going away, ...he would have said, "I want to ...e!" But he ended in a pig-pen.

Dr. Foreman

e Lost Are All Around

...men and women get lost today ...the same reason. They look ...life in the wrong place. Vic... of narcotics, or of alcohol, ...ented something more out of life ...an they had, and they thought ...ol or drugs would help them. ...very patient in an alcoholic ...ard is missing somewhere— ...ssing from payrolls, from homes ...y had or might have had, ...ssing from the ports they might ...e reached if they had not ...de shipwreck of themselves. ...d for every patient in some ...coholic ward there are a great ...ny others who, though they ...ay not have gone so far, are ...t as lost. What ought a Chris...an's attitude to be, toward such ...ople? Surely if Jesus taught ...ything plainly, it is that God ...es not despise or hate lost per...ns; he loves them and does not ...ant them to stay lost. So the ...ristian who shares the mind of ...rist will neither hate nor de...ise the lost people all around ...m today.

evention Is Better

One of the commonest ways of ...tting lost is through drink. Ev...ything is done in advertising ...d in other ways to make it ...ppear that you haven't really ...ed till you use "our old famous ...ame" of expensive alcohol. ...ung people need to have the ...her side of it shown to them, ...n Don'ts but in Do's. Educa... H. H. Hill (as adapted in ...ten") has put it something ...e this. What do you want from ...r Topnotch health? You can't ...y it if you drink. A serene, ...tisfying, law-abiding life? Not ...n liquor for your companion! ...e on the highest moral level? ...r for drinkers and dopers. Do ...u want to wake up every morn... with a clear head? Do you ...ve uninterrupted success in a ...ofession? Do you want to save ...oney? To be a good driver? To ...ve the habit of meeting your ...oblems squarely without a fuz... mind? Do you want to be able ...enjoy a good time without the ...nger of flirting with a habit-...rming drug? Do you want guar...teed immunity to one of Amer...a's four most damaging dis...ases? Do you want to be an ex...mple of good and not evil, for ...e young people in your commu...ty? All right,—that's living, and ...u can't have that kind of living ...d the alcohol habit too.

estimonials

Maybe the main reason why the ...odigal son went wrong was that ...e listened to the wrong people. ...ople can always be found who ...n be paid to pose in liquor ads. ...ow about listening to some free ...estimonials on the other side? ...ra Benson, Secretary of Agri...lture, says: "Knowing the in...ase joy and peace of mind which ...sult from never having used ...arcotics, smoked cigarette, or ...ken a drink of liquor . . . or ...owingly profaning the name of ...d, I can sincerely recommend ...ch a course to all." Dr. Kate ...rcomb, written up in the Read...r's Digest in June, 1954, says: ...Naturally I do not use intoxi...nts. Why start a habit so many ...ople must break?" Lewis Hoad ...f tennis fame speaks for many ...other athlete: "It is hard ...nough to get anywhere in life, ...without liquor or tobacco hinder...ing one's chances for the future." ...Gil Dodds, the track star, says: ..."God has given me a body which ...I should not defile." Do you want ...to live? Such people know how.

FARM NEWS

By J. A. Smith, County Agent

Recommended Tobacco Varieties

Fire-cured: Brown Leaf, Walkers Broad Leaf, Hastings, Tail Orinoco, Vesta 55 (Black shank soils).

Sun-cured: Little Sweet Orinoco.

Burley: Virginia B-29, Burley 2, Burley 1, Kentucky 16, Burley 11-A (Black shank infested soils).

Topdress Alfalfa

Alfalfa stands over one year old should be topdressed with from 600 to 1,000 pounds of 1-10-20 fertilizer or the equivalent plant food in another analysis fertilizer. Over the past ten years alfalfa yields have averaged just under 2 1-4 tons per acre. In the year of 1955 alone the average yield was just over 2 1-4 tons, yet the Virginia Experiment Station and many farmers have obtained yields of up to five tons per acre.

Each ton of alfalfa harvested removed 45 pounds of nitrogen, 12 pounds of P2 05 and 45 pounds of K2 0. Properly inoculated, alfalfa fixes its own N, but the phosphorus and potash must be supplied either by the soil or by fertilizer. In most Virginia soils these nutrients must be largely supplied by fertilizer if yields are to remain high.

A four ton alfalfa hay yield removes 48 pounds of P2 05 and 180 pounds of K2 0 per acre. If 1,000 pounds of 0-10-20 per acre is applied as a topdressing, 100 pounds of P2 05, and 200 pounds of K2 0 are supplied to the soil. Of this total amount of plant nutrients, however, only about 20 pounds of P2-05 and approximately 150 pounds of the K2 0 are available for the current alfalfa crop.

Alfalfa may be topdressed in the dormant season or immediately after the first and second cutting, before the new growth begins to avoid burning. Experiments to date indicate that the important fact is to get the fertilizer applied.

Prune Cherry and Plum Trees

Black Knot is a disease found on many cherry and plum trees in the home orchard. This disease is recognized by the black knotty growth appearing on twigs. In order to control this disease, pruning of all the infected branches is recommended. Cuts should be made 4 to 6 inches below the knots. After the job has been completed, all prunded material should be burned to prevent the spread of the infection.

Sprays containing copper which are usually employed for leaf spot control when growth begins, are also helpful in controlling this disease.

Fertilization Aids in Weed Control

In the next few years, farmers in this area will be hearing more about chemical weed control. Last summer several farmers in Appomattox County sprayed corn fields with 2,4-D to control weeds. Those doing so had very satisfactory results. Experiments conducted last summer at the Experiment Station showed that when crops were well fertilized better weed control was obtained. Crops that have been well fertilized have a higher copper hydrate content in the leaves than those that were poorly fertilized. Plants that were starved or lacked sunshine were not as sensitive to the 2,4-D spray. It was also observed that best results were obtained when the material was applied after several days of good growing weather when the temperatures were above 60 degrees and the soil moisture high.

Grain Storage

As of July 1, the Food and Drug Administration will tighen sanitary requirements on grain. When one or more rodent pellets per ping (liquid measure) or grain, and/or 1% or more of insect damaged kernels are found, the grain will be considered unfit for human food. Therefore, if grain is being stored on your farm, it will be necessary to comply with these regulations if you plan to sell it for milling purposes.

Some ways to help maintain high quality grain: clean grain bins as soon as possible; provide smooth walls and floors; eliminate large crevices and cracks; make storage rooms rat proof, bird-proof and weather tight; remove trash from under buildings; provide an air-tight cover so that bins may be properly fumigated.

Tests carried out in Experimental Stations in some of the other states show that grain with less than 9% moisture, had no insect infestations. Grain with 11% moisture had infestations ranging from 32½ up. Therefore, methods should be developed whereby moisture content can be lowered. The best way of accomplishing this is to have forced air passing through the grain.

DRIVERLESS AUTOMATION

Decatur, Ill.- A car without a driver rolled backward and moved diagonally across an intersection, bounced off a traffic island, turned completely around and headed up a railroad embankment, where it stopped, unscratched. Its owner got in and drove off.
